2 · Today's News → Market Moves

S&P; 500 +1.50% · Nasdaq-100 +~1.1% · Dow +1.23% (all-time record)

A · Iran Diplomacy / Oil Collapse [Primary — contributed ~0.8–1.0 ppt to S&P;]

Trump called off a planned strike on Iran, reopening Strait of Hormuz negotiations. WTI fell 5.97% to \$79.62; Brent fell 5.69% to \$82.92. Lower energy costs reduce inflation expectations, push rate-cut odds slightly higher, and relieve the geopolitical risk premium that had weighed on markets since late July when Brent briefly exceeded \$90. Airlines, transport, and consumer discretionary were immediate winners.

B · Amazon AWS Blowout — \$3 Trillion Milestone [~0.4–0.5 ppt]

Amazon Q2: revenue \$200.6B (est \$196.5B); AWS \$42.2B (est \$40.5B). AMZN +5.2% to \$285.79, crossing \$3T market cap for the first time. Validates AI-cloud capex cycle; bullish for entire hyperscaler complex.

C · Meta +7% on Ad Revenue Surge [~0.3–0.4 ppt to QQQ]

Meta Q2 ad revenue +27% to \$59B, recovering sharply from the May miss. Meta is ~5% of QQQ; its 7% surge contributed ~35 bps directly.

D · MSFT +5%, GOOGL +5% — Hyperscaler AI Capex Confidence [~0.2–0.3 ppt]

Microsoft Azure momentum + Alphabet raising FY2026 capex to \$195–205B. Google Cloud grew 82% in Q2. Combined signal: AI infra buildout is not slowing.

E · ISM Manufacturing PMI 55.6 — 4-Year High [~0.1 ppt]

July ISM Mfg at 55.6 (vs 53.3 prior), New Orders 56.7, Production 58.5. 21st consecutive month of expansion. Cyclical and industrials added modestly.

F • Philadelphia Semiconductor Index (SOX) -1.9% [Drag: ~-0.4 ppt on QQQ]

Micron and Broadcom led chip stocks lower on DRAM/NAND pricing concerns. This is why QQQ (+~1.1%) significantly lagged the Nasdaq Composite (+2.1%).

4 · Next-Day Scenarios — Tuesday August 4, 2026

Calendar: AMD Q2 (after close tonight); Palantir Q2 (pre-market); Disney / Shopify / McDonald's / Pfizer / Airbnb earnings during the day. ISM Services PMI = Wednesday Aug 5. Nonfarm Payrolls = Friday Aug 7.

1 · AMD Q2 Earnings (After Close — Impact Tuesday Pre-Market)

■ **IF BEAT:** Revenue >\$11.2B + strong Helios/Instinct guidance:

THEN AMD +8–12% pre-mkt; SOX rebounds 1–2%; NVDA/AVGO sympathy +2–3%; QQQ +0.6–0.8%; SPY +0.3%. Validates AI GPU cycle breadth beyond NVIDIA. Key: Helios GPU ramp guidance matters more than the quarter itself.

■ **IF MISS:** Revenue <\$11B or weak Helios margin/guidance:

THEN AMD -8–15% pre-mkt; SOX -2–3%; semis drag QQQ -0.5–0.8%; SPY -0.3%. Deepens semiconductor cycle concern; AI capex narrative questioned.

2 · Palantir Q2 Earnings (Pre-Market)

■ **IF BEAT:** Rev >\$1.81B + EPS >\$0.35, raised FY guidance:

THEN PLTR +5–8%; AI defense software peers +2–3%. Negligible direct SPY/QQQ impact (PLTR is ~0.25% of S&P;) but validates US Gov AI spending cycle.

■ **IF MISS** or valuation concern (P/S ~61x; Motley Fool bearish):

THEN PLTR -10–15%; high-multiple growth de-rating risk; minimal SPY impact but sentiment drag on enterprise AI software names.

3 · Iran / Strait of Hormuz Overnight

- IF Ceasefire framework or further talks progress:
THEN WTI <\$75; SPY futures +0.4–0.6%; airlines +3%; inflation expectations fall; rate-cut odds rise slightly; REIT/utility defensive bid unwinds.
- IF Talks collapse; Iran threatens Hormuz:
THEN WTI → \$90+; SPY -1.0–1.5%; airlines -4%; energy +3%; QQQ -1.2% (tech most rate-sensitive to oil-driven inflation).

4 · NFP Jobs Report Friday Aug 7 (Sets Week Tone)

- IF Strong: >200K jobs, wages +0.4% MoM:
THEN Fed stays on hold; 10-yr yield +10 bps; SPY -0.5–1%; rate-sensitive sectors (tech, REIT) underperform; USD strengthens.
- IF Weak: <150K jobs or unemployment rises:
THEN Recession fear vs. rate-cut hope dynamic; SPY -0.5–1.5%; or if Fed cut priced in quickly, bonds rally and SPY may reverse.
